### PROFESSIONAL SUMMARY

Computer Engineering student at UNMdP, self-taught and product-oriented. Designs and builds complete web applications with TypeScript, React, Next.js and Node.js, from data modeling to UI implementation. Has delivered products to real clients and is currently developing a SaaS platform for launch.

### SKILLS

|           |                                                                                                        |
|-----------|--------------------------------------------------------------------------------------------------------|
| Languages | TypeScript · JavaScript (ES2023) · SQL · HTML5 · CSS3                                                  |
| Frontend  | React 19 · Next.js 16 (App Router) · Vite · React Hook Form · Zod · CSS Modules · Tailwind CSS · Konva |
| Backend   | Node.js · Next.js Server Actions · NextAuth (Auth.js) · JWT · bcrypt · Multi-tenant architecture       |
| Data      | Prisma 7 · PostgreSQL · Schema design · Transactions                                                   |
| Testing   | Vitest · Playwright · Lighthouse budgets                                                               |
| Tools     | Git · GitHub · Linux · Neovim · VS Code · pnpm · Biome                                                 |

### PROFESSIONAL EXPERIENCE

**Carta QR — SaaS platform for restaurants** 2025 – Present  
*Full-Stack Developer · Independent product*

Multi-tenant SaaS with QR menu, in-table ordering, cash-register management and analytics. Layered architecture: Repository → Use Case → Server Action with Next.js 16 Server Actions.

- Multi-tenant with subdomain routing and per-venue isolation
- Realtime with Soketi/Pusher WebSockets and push notifications for staff
- Auth.js + Google OAuth + RBAC; Zod validation end-to-end
- Testing suite: Vitest + Playwright + axe-core + Testcontainers

Next.js 16 · React 19 · Prisma 7 · PostgreSQL · Auth.js · Soketi · Zod · Docker · nginx

**Boston Automotores — Car dealership website** 2024  
*Freelance Web Developer · Car dealership (real client)*

Public website and admin panel: vehicle catalog with brand, price and mileage filters, inventory management, technical sheets, lead capture and email notifications. Delivered, in active production use.

Next.js · React · Prisma · PostgreSQL · Cloudinary · JWT · Resend

**Bowling de Paso — Bowling venue website** 2024  
*Freelance Web Developer · Bowling de Paso (real client)*

Public website with WhatsApp channel integration, LocalBusiness schema cards and optimised OpenGraph. Technical SEO: JSON-LD, sitemap, metadata. Delivered, in active production use.

React · Vite · CSS Modules · GitHub Pages

**Tu Amigo FI — UNMdP Engineering students platform** 2024 – 2025  
*Full-Stack Developer · Independent product*

Collaborative platform for sharing practical material, midterm exams, answers and comments across degrees and years. Complex domain modeling: degrees, study plans, terms, prerequisites. Google OAuth, file uploads, search, department filtering.

Next.js · React · Prisma · PostgreSQL · NextAuth · Cloudinary

**Pathfinder — Tabletop RPG battle manager** 2025  
*Full-Stack Developer · Independent product*

Web application for Pathfinder / D&D 5e. Canvas-based maps with Konva, initiative tracking, conditions, spells and scenario persistence. Layer system, PostgreSQL persistence, multi-user.

Next.js · React · TypeScript · Konva · Prisma · PostgreSQL · Zod

### EDUCATION

**Ingeniería Informática — Universidad Nacional de Mar del Plata (UNMdP)**  
2019 – Present · In progress · Fourth year · ~60% complete

**Técnico en Alimentos — Educación Secundaria Técnica**  
Completed

Languages: Español Native · English B1
